Call for paper (Korea) Terindex Scopus

## Experience

01.2016 - 08.2018

**Full Stack Engineer**  
Surabaya, Indonesia

At 2016 September I was working at one of University in Surabaya as a Programmer or Full-Stack Engineer. In this institution, my jobs are developing some applications needed by them for example, Payroll System for employees and lecturers, Application for reporting lecturer name and their achievements in Indonesia Beban Kinerja Dosen (BKD), Correspondence System for employees and students, Public Facilities System and the others

08.2018 - 12.2018

**Remote Backend Engineer**  
Sidoarjo, Indonesia

Then I've working Remote in one of an institution in Sidoarjo East Java Indonesia at the Software House. Software house receives order application by clients and the others. My tasks are maintenance or develop another module to the application running well in client-side.

01.2019

**Backend Engineer (Golang)**  
Jakarta, Indonesia

Start from 2019 I'am start coding with Go Language or Golang, I'am working in startup in jakarta untill now, i start working from maintenance and move laravel to Golang, from monolithic system to microservices, database using Mysql because first time using mysql and so many discuss, decided still mysql but language program change from PHP (Laravel) to Go Language, and some microservice using message broker specially RabbitMQ. My daily activity change old flow to new flow and change from monolithic to microservices.
